

STRONG, DEPENDABLE, AMERICAN

A Great Defense Can Weather All Things

Let Castia Stone protect your investments.

When your buildings need a protective cladding, investment in a product that provides function and form is the protocol. Castia Stone answers this call of duty. As a proud American-owned company, we understand that excellent quality and sound craftsmanship go hand-in-hand.

Castia Stone was selected to clad the Battalion Headquarters Building at Fort Wainwright in Fairbanks, Alaska. From a cold weather test station to one of the Army's premier training areas, Fort Wainwright has come a long way. As a site once used for testing cold weather clothing and equipment in the bitter cold winters, this Fort required something that would stand up to the elements. Castia Stone has many features that make it optimal for installing in harsh climates like Fairbanks, Alaska as well as all other climatic areas of the world.

Fairbanks, Alaska

The "Rainscreen" Advantage

Castia Stone, backed by its tested strength, durability and "rainscreen" technology, provides the designer with security and peace of mind. Brackets, made of recycled material, mechanically hold the siding on to the building and create a continuous 1/2" gap between the siding and the actual structure. This air space prevents trapped moisture, which can lead to dry rot and mold.

Since Castia Stone is a mortarless product, not only is it a more cost effective alternative to traditional siding products, but the ease and speed of installation means that it can be installed in any climate during any time of the year.

The soldiers of the U.S. Army at Fort Wainwright, Alaska, are prepared to rapidly deploy worldwide in defense of U.S. interests or on humanitarian missions. Let Castia Stone protect your buildings, while you protect our country.
